HEADLINE: Reshaping the electricity industry

BODY:

... finely adjusted. The arrival on the market of interactive meters linked by the Internet will allow demand to adjust better to the price on offer, and so make for better management of consumption peaks.

Where big customers are concerned, managing their "intricacies", i.e. the fluctuations in instantaneous demand around a contractual base, will be more economical if a competitive spot market is accessible.

The electricity companies' strategy is taking clearer shape

Despite all the differences, it is clear that a pan-European electricity industry is in the process of emerging. Corporate strategies have to take account of possible market developments. Recent trends in the United States are instructive: the ...

Foster Electric Report

July 10, 1996

SECTION: Report No. 90; Pg. 8

LENGTH: 1212 words

HEADLINE: NEW HAMPSHIRE CO-OP CLAIMS PSNH'S REFUSAL TO ALLOW POWER PURCHASE REDUCTIONS IS AN ATTEMPT TO BLOCK THE ADVENT OF RETAIL COMPETITION IN NEW HAMPSHIRE

BODY:

... Next, PSNH's stranded-cost claims are "a strange--and inaccurate--interpretation of a partial requirements contract," the Cooperative argued. PSNH will have almost no stranded costs due to retail competition because, under the contract, the Cooperative's wholesale purchases are designed to fluctuate with its retail demand, the Cooperative insisted. If demand for the Cooperative's power supply drops, the contract dictates that the Cooperative's purchase obligations fall correspondingly.

The Cooperative next attacked alternative transmission tariffs (ER96-1868) filed by PSNH with FERC. Under one of the filed tariffs, the Cooperative would continue to pay for the entire power and energy requirements of its ...

BYLINE: By Political Writer GREG KELTON

BODY:

... sellers and negotiate their own price.

Initially, only very large customers will be able to source their power competitively by buying it in small blocks of about half an hour.

According to government sources, this will allow them to fine-tune their contract for power one to two days ahead of delivery because electricity supply and demand varies widely depending on weather and changes in production schedules.

As an example, a company which knows it faces a huge rush order two days ahead could negotiate with a power retailer for a special rate ...

Knowledgeable observers say Emergency Financial Control Bd will ****demand**** some ****modifications**** in new transit ****contract**** because of its implications for other city unions. Predict that some action will be taken to hold down cost when city unions' contracts expire. TWU leaders are watching transit strike in San Francisco, where workers are making little headway against wage cuts. MTA says it can generate productivity savings to pay for transit workers' cost-of-living raises. Mayor Beame, who almost rejected transit contract in final hrs, may insist that cost-of-living and productivity provisions be absolutely linked. Gov Carey says no contract before bd can have effect that will distort state's financial plan. Beame says accord would exceed city's financial plan if applied to city agencies. MTA Chmn David L Yunich asks Beame to support contract, but Beame indicates that he will vote against it. Theodore W Kheel, whom some participants called most important man in preventing transit strike, comments (M.)

ADJUSTING SYSTEM OF RATE USING PORTABLE STORAGE MEDIUM

PUB. NO.: 03-075568 [JP 3075568 A]
PUBLISHED: March 29, 1991 (19910329)
INVENTOR(s): FUKUSHIMA MITSUAKI
 WAKE SHOJI
 TORII HISANOBU
APPLICANT(s): OSAKI ELECTRIC CO LTD [358680] (A Japanese Company or
 Corporation), JP (Japan)
 TOKYO ELECTRIC POWER CO INC THE [330194] (A Japanese Company
 or Corporation), JP (Japan)
APPL. NO.: 01-211474 [JP 89211474]
FILED: August 18, 1989 (19890818)

ABSTRACT

PURPOSE: To enable exact and efficient execution of various processings including load survey by storing prescribed information (e.g. revision of a rate) in a portable storage medium and by conducting processings (e.g. processing of an amount of money) in accordance with this stored information.

CONSTITUTION: When the power rate is altered, for instance, a master card (magnetic card) 11 wherein a new rate and a date of execution of alteration are stored is prepared by an **electric** **power** **company** 1. Taking this card with him, a company's stuff in charge goes to a device 3 on each user side and makes a card reader/writer R/W (constructed for the magnetic card) of an reset unit 25 read the contents of the card, which are stored in RAM. Thereby the rate is altered automatically from the date of execution of alteration under the control of CPU of the reset unit 25. When the user desires that a **contract** demand be **altered**, he brings his customer card 13 to a rate card distributor 5 and has the card 13 rewritten as to the content of the contract demand. This card 13 is made to be read by the R/W of the reset unit 25 of the device 3 on the user's side. The **contract** demand is **altered** from a time point when the card is read. Based on the altered demand, the CPU controls a circuit breaker 23.

Micron's increasing consumption to qualify for lower electric rates

Idaho Statesman (Boise, ID), pB8

May 18, 1994

Language: English Record Type: Abstract

Document Type: Newspaper; Trade

ABSTRACT:

Micron Technology has *renegotiated* its *contract* with Idaho Power to receive a special reduced rate for increased power consumption. Micron expects to increase its *usage* from the maximum of 25,000 kilowatts under its current *contract* to 37,000 kilowatts. The agreement awaits approval by the Idaho *Public* *Utilities* Commission. Typically, utilities charge lower rates to larger industrial users than to smaller users, such...

... 1987, the company's energy cost is 4.75 cents per kilowatt hour consumed.

Previous *Contract*

In comparison, under the previous *contract* Hecla's energy costs *fluctuated*, reflecting the peaks and valleys of *demand* for power. For example, during the summer as *demand* increased so did the *power* *company*'s costs, which in turn led to higher user charges. The revised *contract* rate is similar to Hecla's cost under the old contract during a moderate period...
